

Greenprints Conference Highlights

The 9th annual Greenprints conference and tradeshow offers non-stop learning and networking opportunities

Opening Keynote Address

Thursday, March 22, 8:00-9:30am

Terri Montague

Terri Montague

"Forging a Sustainable Future"

Terri Montague is a respected national voice on creating sustainable communities. She will share her

insights on core strategies being undertaken in cities and communities across the country as well as profile Atlanta's Beltline and other local collaborations. She will also reflect on key aspects of other movements and their critical impact on the "sustainability" movement.

Sponsored by Green Building Blocks

Table Talk Luncheon

Thursday, March 22

Shift 1: 11:30am - 12:45pm

Shift 2: 12:45pm - 2:15pm

At each of Thursday's two lunch sessions, designated tables offer the opportunity to share expertise in moderated "Table Talks."

Green Tradeshow

Thursday - 9:30am-4:00pm

Friday - 7:30am-3:30pm

The green tradeshow offers attendees insights into solving your day-to-day green building challenges. Meet knowledgeable professionals ready to share information on the latest technologies, products and services, mingle with your peers, network with industry leaders and enjoy complimentary refreshments...all under one roof!

March 22-23, 2007

Thursday Welcome Reception

4:00 - 6:00pm, Café

Join fellow conference-goers for a social hour in the fifth floor Café.

Friday's "Hands Free" Nail Apron Luncheon is a Greenprints favorite

Come to the tradeshow, grab a Home Depot nail apron, load in your lunch and keep your hands free to trade business cards and collect information on all the great products and services our exhibitors have to offer.

Closing Reception and Alternative Fuel Vehicle (AFV) Show

Hosted by Acuity Brands

Friday, March 23, 5:30-7:30pm

Greenprints 2007 closes with a spectacular reception at the Southface campus. This final conference event will give attendees an opportunity to get acquainted with the Southface facility and get a sneak peak at the soon to be completed Eco Office.

The Alternative Fuel Vehicle Show (AFV) will give conference goers a close up look at some interesting state-of-the-art and latest-on-the-market transportation options.

Commercial Track. Commercial Green Building is an ever changing and developing field. This track will examine the challenges commercial green builders face and the research and development that mold this unique discipline. Participants will gain hands-on experience for practical application. Sessions will speak to a varied audience and a wide range of topics.

Residential Track. Residential green construction is an increasingly "hot topic." This track will explore the many facets of marketing green residences and new trends for single and multi-family dwellings. This track also includes systems analysis tools for solution building and problem solving.

Beyond Building. The Beyond Building Track addresses applications in sustainable design and development at the site and community levels. This track is relevant to both the residential and commercial sectors. The two charrettes provide a practical exploration of the challenges of designing innovative green communities. There will be a variety of discussions on the benefits of sustainable design and construction including sustainable interiors, greening a business and reducing liability through green building.

Site Sessions. Five different tours are available and attendees will experience first hand green building facilities, both commercial and residential, and green manufacturers. Sites include:

- Southface Eco Office
- Oakland Park mixed-use condo and an EarthCraft House designed for disassembly
- Seydel EcoManor - Georgia's first LEED Home
- Toto Facility
- 17th Street High-rise at Atlantic Station

There is an additional \$25 charge for all site sessions.
